Flu Season in Australia

Seasonal Allergies

Boosting Immunity

Importance of Gut Health

● PRACTICE DOCTORS

Dr A R Jeri

MB BS (Hon), Adv Dip Obst RANZCOG, FRACGP
Special Interests Obstetrics and Women's Health

Dr R Christmas

MB BS, FRACGP, DRANZCOG
Special Interests: Obstetrics & Women's Health

Dr J Smith

BMed (Dist) FRACGP
Special Interests: Women's Health & Mental Health

● REGISTRARS

At times there will be registrars working at the practice. A registrar is a fully qualified Doctor training to specialise in general practice.

● VISITING SPECIALISTS & HEALTH SERVICES

- Hearing Aid Specialists Riverina** Audiologist/Audiometrist
- Active Foot Clinic** Podiatry
- Ms D Hann** Diabetes Educator
- Mr Lee Seary** Psychologist
- Dr M Payne** Surgeon
- Dr S Sowter** Urologist
- Dr R Thomas** Urologist
- Dr A Bradshaw** Orthopaedic
- Dr M Howard** Orthopaedic
- Healthy Sleep Solutions** Sleep Apnoea
- Paediatric Outreach Clinic** Paediatrics
- Cardiac Outreach Clinic** Cardiology
- Hannah Alchin** Womens Health Physio
- Ingrained Nutrition** Dietician

● PRACTICE STAFF

- Practice Manager:** Kim Lynch
- Practice Nurses:** Christina Harper, Leeanne Whittaker, Catherine Chalmers, Libby Hanlon, Mandy Wells, Kerin O'Connor, Gillian Turner & Lucy Rowe
- Reception Staff:** Gail Dahlenburg, Leeanne Reardon, Sharee Derrick, Leanne Von Mengerson, Emily Watts & Gail Bosman

● SURGERY HOURS

Monday to Friday.....9.00am – 5.00pm
(Consulting from 9.30am)

● AFTER HOURS & EMERGENCY

The Doctors in Temora share after hours service for urgent medical problems. This service is provided through Temora and District Hospital. The telephone number is **6980 0200**. The doctor on-call will attend to your needs. In the event of an emergency dial **000**.

● SPECIAL PRACTICE NOTES

Medical Students are frequently present at a time from University of Sydney, UNSW, Wagga Rural Clinic School, Albury Clinical School or John Flynn Scholarship Program. Your GP will ask for your consent to have the student present before he sees you. If you prefer not to have a student present at your consultation please say so.

Our Practice Nurses provide basic nursing care including immunisations, wound care and other nursing duties. They attend regular professional development updating courses.

Patient Health Information. TMC has comprehensive policies on the management of patient health information. All patient health information is kept strictly confidential by our Practice. All staff have signed confidentiality statements and are aware of, and fully comply with, the Australian Privacy Principals. A copy of our Privacy Policy is on display at Reception. Should you wish to discuss privacy and confidentiality of your health information please talk to your GP.

Repeat Prescriptions. 1 WEEK is required for repeat prescriptions, and a fee of \$5.00 is charged. However, an appointment for a consultation with the doctor may be necessary.

Webster packs are available upon request - however a fee will be charged bi-annually.

Disabled Access. Wheelchair and disabled access is available at each entrance/exit and ambulance access is available from the car park, second entrance/exit at the side of the building. **Toilet facilities are provided for patients using wheelchairs.**

Test Results. Your GP will advise when they expect the results to arrive at the practice. Due to the demand on our GP's time, patients will only be contacted if results require further action. If you wish to check your results please call between 2:30pm & 4:30pm (weekdays).

Children & Babies. A small play area is provided for children. A change table for parents with babies is also available.

Flu Clinics. Starting in May

● BILLING ARRANGEMENTS

Temora Medical Complex is now Bulk Billing consultations. ALL procedures, medicals and commercial licences etc will remain the same and a private fee charged. Refer to the notice at the reception desk. We expect payment at the time of examination / procedure. Payment can be made with cash cheque or credit card. If financial hardship please discuss with Dr at the time of consultation.

● NON ATTENDANCE FEE

If a patient fails to attend their appointment a non-attendance fee of \$40 may be charged.

The non-attendance fee must be paid before any future appointments can be booked or attended.

Work cover non attendants will be billed to patients personal account, not through insurance company.

● APPOINTMENTS

Consultation is by appointment. Urgent cases will be seen on the day. Appointments for longer consultations can be made at the desk.

Home visits are provided when necessary/possible.

Flu Season in Australia and the Importance of Vaccination

Influenza (flu) season in Australia typically occurs between May and September, peaking during the colder winter months. The flu is far more than a bad cold — it is a highly contagious viral infection that can lead to serious complications such as pneumonia, worsening of chronic medical conditions, hospitalisation, and even death, particularly among vulnerable groups.

Young children, pregnant women, older adults (65+), Aboriginal and Torres Strait Islander peoples, and those with chronic illnesses such as asthma, diabetes, or heart disease are at greatest risk. However, healthy adults can also experience severe illness and contribute to spreading the virus to others.

Annual vaccination is the most effective way to protect yourself and your community. Because influenza viruses constantly change, the vaccine is updated each year to target the strains most likely to circulate that season. Immunity develops about two weeks after vaccination, which is why health authorities recommend getting vaccinated from April onward, before flu activity increases.

The flu vaccine not only reduces your risk of catching influenza but also lowers the severity of illness if you do become infected. Importantly, widespread vaccination helps protect vulnerable people through community immunity, reducing overall transmission.

In Australia, the flu vaccine is free under the National Immunisation Program for high-risk groups and widely available through GPs, pharmacies, and community clinics.

Alongside vaccination, good hygiene — including handwashing, covering coughs, staying home when sick, and wearing a mask if symptomatic — helps limit spread.

Getting your flu shot each year is a simple, safe step that protects both your health and the wider community. Speak to your GP to book your vaccination.

Managing Seasonal Allergies in Autumn

While many people associate allergies with spring, autumn can also trigger troublesome symptoms. During this season in Australia, falling leaves, increased mould spores, dust mites, and lingering pollen can provoke allergic rhinitis (hay fever) and asthma flare-ups. Common symptoms include sneezing, a runny or blocked nose, itchy eyes, throat irritation, coughing, and fatigue, which can affect sleep, concentration, and daily comfort.

Mould is a major autumn trigger, thriving in damp environments created by cooler temperatures and increased rainfall. Raking leaves, gardening, or spending time around compost can release mould spores into the air. Indoor allergens may also worsen as people spend more time inside with windows closed, allowing dust mites to accumulate.

Practical steps can significantly reduce symptoms. Check daily pollen and mould forecasts where available, and limit outdoor activities on high-count days. Wearing sunglasses and a mask while gardening can help reduce exposure. Showering and changing clothes after being outdoors prevents allergens from spreading inside the home.

Indoors, keep humidity low by ventilating rooms when possible, using exhaust fans, or running a dehumidifier. Wash bedding weekly in hot water to control dust mites, vacuum regularly with a HEPA filter, and consider an air purifier in bedrooms.

Medications such as non-drowsy antihistamines, saline nasal sprays, or corticosteroid nasal sprays can be effective when used correctly. People with persistent or severe symptoms, or those with asthma, should consult their GP for personalised advice and management plans.

With awareness and simple preventive measures, most people can keep autumn allergies under control and enjoy the season more comfortably.

Boosting Immunity Before Winter

As winter approaches in Australia, colds, flu, and other respiratory infections become more common. Strengthening your immune system ahead of the colder months can help reduce your risk of illness and support faster recovery if you do get sick. While no supplement can “supercharge” immunity overnight, consistent healthy habits make a significant difference.

Nutrition plays a key role. Aim for a balanced diet rich in vegetables, fruits, whole grains, lean protein, and healthy fats. Nutrients such as vitamin C, vitamin D, zinc, and iron support immune function. Foods like citrus fruits, berries, leafy greens, nuts, seeds, eggs, fish, and legumes are excellent choices. Staying well hydrated is equally important, even when the weather is cooler.

Quality sleep is one of the most powerful immune boosters. Adults should aim for 7–9 hours per night, as poor sleep can reduce the body’s ability to fight infections. Regular physical activity also supports immune health,

circulation, and mood — even moderate exercise like walking most days is beneficial.

Managing stress is often overlooked. Chronic stress can weaken immune responses, so practices such as mindfulness, relaxation, social connection, and time outdoors are valuable.

Finally, staying up to date with recommended vaccinations, including the annual flu shot, provides targeted protection during winter.

By building these habits in autumn, you give your immune system the best chance to keep you well throughout winter.

personalised advice and management plans.

With awareness and simple preventive measures, most people can keep autumn allergies under control and enjoy the season more comfortably.

The Importance of Gut Health

Gut health has become a major focus in modern healthcare — and for good reason. Your gut is home to trillions of microorganisms, collectively known as the gut microbiome, which play a vital role in digestion, immunity, metabolism, and even mental wellbeing. A balanced microbiome helps break down food, absorb nutrients, produce essential vitamins, and protect against harmful bacteria.

Poor gut health has been linked to a range of issues, including bloating, constipation, diarrhoea, fatigue, skin conditions, weakened immunity, and mood disturbances such as anxiety and depression. Diet, stress, sleep, medications (especially antibiotics), and lifestyle habits all influence your gut health.

Supporting your gut starts with what you eat. A diet rich in fibre from vegetables, fruits, whole grains, legumes, nuts, and seeds feeds beneficial bacteria. Fermented foods such as yoghurt, kefir, sauerkraut, kimchi, and miso provide natural probiotics that help maintain microbial balance. Limiting ultra-processed foods, excess sugar, and alcohol can also reduce inflammation and support digestive health.

Other helpful habits include staying hydrated, managing stress, exercising regularly, and getting enough sleep.

A healthy gut contributes to overall wellbeing, from stronger immunity to improved energy and mood. By making simple lifestyle and dietary changes, you can nurture your gut microbiome and support long-term health from the inside out.

If you have any concerns about your gut health, speak with your GP.

Enjoying Easter Without Overindulging

Easter is a time for celebration, family gatherings, and, of course, chocolate. While it’s perfectly fine to enjoy festive treats, it’s easy to overindulge, leaving you feeling sluggish, bloated, or guilty afterwards. The key is balance — enjoying your favourite foods mindfully while maintaining healthy habits.

Start by choosing quality over quantity. Instead of grazing on multiple sweets throughout the day, select a small portion of chocolate you truly enjoy and savour it slowly. Eating mindfully — paying attention to taste, texture, and satisfaction — can help prevent the urge to keep reaching for more.

Avoid arriving at celebrations overly hungry, as this often leads to overeating. Having a balanced meal or healthy snack beforehand, such as yoghurt, fruit, or nuts, can stabilise blood sugar and appetite. Staying hydrated is also important, as thirst can sometimes be mistaken for hunger.

Try to keep to a regular meal schedule and include nourishing foods like vegetables, lean protein, and whole grains. This helps maintain energy levels and prevents the “sugar crash” that often follows excessive sweets. Keeping active over the long weekend — whether through walks, outdoor games, or family activities — also supports both physical and mental wellbeing.

Remember, one day of indulgence won’t harm your health, but moderation will help you enjoy Easter without discomfort. By focusing on balance rather than restriction, you can celebrate fully while still feeling your best.

- **OTHER SERVICES OFFERED**
- Home Visits
- Minor Surgery
- Vaccinations
- Family Planning
- Teleconferencing
- Counselling
- Medical Reports
- Cardiograms
- Pregnancy Test
- Nutrition Advice
- Pilot Medicals
- Pap Smears
- Treatment for Sun Spots
- Recalls/Reminders
- Treatment for Skin Cancers
- Health Assessments
- Workers compensation
- Medicals for licenses
- Telephone Consults
- Management Plans/Team Care Arrangements

- **SPECIAL PRACTICE NOTES**

Confidentiality. The practice is committed to providing comprehensive general practice to all individuals and families in this community. All patient consultations and medical records are kept strictly confidential. Signed consent forms are essential before any patient health information will be transferred. All electronic information is encrypted. A privacy brochure is available upon request.

Sterilisation of Equipment. All equipment used in the surgery is either disposable or is sterilised in an autoclave (as used in hospitals).

Telephoning your doctor. Phone consultations are available upon request-however, will incur a fee if not covered by a concession card

Electronic communications. Electronic communications with patients is not standard procedure. When necessary, patient consent is obtained and documented in accordance with the RACGP standards.

Certificates. Medical certificates are legal documents. They are available only if you present for a consultation with one of our doctors. We cannot issue certificates without you actually seeing a doctor. We are not allowed to issue certificates that are back dated.

Your comments on our medical services are always welcome. If there is any way we can improve for your benefit, we will. Direct any queries to our Practice Manager.

If you prefer, you can contact the Health Care Complaints Commission on 1800 043 159 or email: hccc@hccc.nsw.gov.au.

EASTER CHOCOLATE & BERRY HOT CROSS BUN PUDDING

This warm, comforting dessert is a perfect way to use leftover hot cross buns after Easter while creating a crowd-pleasing treat for family gatherings.

Ingredients (Serves 6–8):

- 6 hot cross buns, sliced in half
- 1 cup mixed berries (fresh or frozen)
- 100 g dark or milk chocolate, chopped
- 4 eggs
- 2 cups milk
- ½ cup thickened cream
- ⅓ cup caster sugar
- 1 tsp vanilla extract
- Butter for greasing
- Icing sugar or extra berries to serve

Method:

1. Preheat oven to 180°C (160°C fan-forced). Lightly grease a baking dish.
2. Arrange sliced hot cross buns in the dish, overlapping slightly. Sprinkle the berries and chopped chocolate evenly between the layers.
3. In a bowl, whisk together the eggs, milk, cream, sugar, and vanilla until well combined.
4. Pour the custard mixture slowly over the buns, pressing gently so they absorb the liquid. Allow to stand for 10 minutes.
5. Bake for 35–40 minutes, or until golden on top and the custard is set.
6. Let cool slightly before serving. Dust with icing sugar or top with extra berries

Serve warm with yoghurt, custard, or a scoop of vanilla ice cream.

This indulgent yet comforting dessert captures the flavours of Easter while reducing food waste — making it both festive and practical but remember in moderation!

EASTER FUN!
